

PRODUCT DATA

AEROSOLS PAINT STRIPPER 2910

DESCRIPTION

RUST-OLEUM® Paint Stripper 2910 is a paint dissolving material based on methylene chloride in an aerosol.

RECOMMENDED USES

RUST-OLEUM Paint Stripper 2910 should be used for quick removal of old paint. RUST-OLEUM Paint Stripper 2910 is intended to remove all types of oil- and alkyd-based paints, emulsion paints, varnish and most two-component materials from metal, mineral and wooden substrates. As RUST-OLEUM Paint Stripper 2910 does not contain acids or alkali's, it will not affect metal, mineral or wooden substrates.

TECHNICAL DATA

Appearance: White, foamy layer
VOC-content: 980 g/l

Coverage

Theoretical: 2-3 m² per aerosol.
Practical: Practical coverage depends on many factors such as type of old coating and shape of the substrate and material losses during application.

SURFACE PREPARATION

Remove loose coatings as much as possible by scraping.

DIRECTION FOR USE

Remove cover cap. Shake vigorously before use. Hold the can approx. 10-20 cm from the substrate. Apply a uniform foam layer of Paint Stripper 2910; allow standing for 5 to 10 minutes, and removing the old layer with a filling knife or paint scraper. Thick layers of some (two-component) products may need an additional treatment. After use, clean the surface with cleaner/degreaser, fresh water or white spirit and allow drying completely before applying a coating.

APPLICATION CONDITIONS

Temperature of air, substrate and aerosol between 10 and 35°C.
Relative humidity below 85%.

REMARKS

RUST-OLEUM Paint Stripper 2910 may affect plastic materials alike e.g. PVC, polystyrene. In case of doubt, try on a small test patch beforehand.

SAFETY

Consult Safety Data Sheet and Safety Information printed on the can.

SHELLIFE / STORAGE CONDITIONS

2 years from date of production in unopened cans, if stored in dry, well ventilated areas, not in direct sunlight at temperatures between 5° and 35°C.
